Topic: Ch.8 2-D shapes (1)

A. Learning Objective:

1. Students can sort 2-D shapes by their shapes and the number of sides.

B. Preview method: Think and record.

Match the following 2-D shapes and copy the names of the following 2-D shapes.

	Objects			Name of 2-D shapes
1.				Triangle <u>Triangle</u>
2.				Quadrilateral <u>Quadrilateral</u>
3.				Pentagon <u>Pentagon</u>
4.				Hexagon <u>Hexagon</u>
5.				Circle <u>Circle</u>

**C. Extension:

1. What is the difference between circle and other 2-D shapes?

Circle is made up of (straight lines / curves).

The other 2-D shapes are made up of (straight lines / curves).

2. Is this slice of pizza a triangle? Why?

It (is / is not) a triangle.

It is because the three sides (are / are not) straight lines.

Can you make a triangle here to see the difference?
